

Hastings' Filter Lines

Lube

No matter how efficient the media, lube filters must stand up to tough operating conditions. Hastings has lube filters for everything from the family car to a commercial backhoe.

Air

Clean air is essential to engine survival and performance. Hastings Premium Filters provides a full line of filters for both automotive and heavy-duty applications.

Fuel

Fuel systems are at great risk for contamination from the very beginning. Hastings filters are designed to fight fuel contaminants, including water. With a Hastings fuel filter installed, your fuel system is protected.

Coolant

Poor cooling system maintenance can cause premature engine failures. Protect your engine with Hastings coolant filters or Supplemental Coolant Additives (SCAs).

Hydraulic

Filters are a critical component of today's hydraulic systems. Hastings manufactures hydraulic filters that meet the requirements of your equipment.

Transmission

Hastings' transmission filters feature Ultracork gaskets that won't crack or tear. Hastings transmission filters provide the protection needed for your transmission.

When Performance Matters...

You Can Purchase Hastings Premium Filters at:

When Performance Matters...

Trust Hastings Premium Filters to provide the protection and reliability you require to keep your cars, trucks and equipment moving.

Coverage

Hastings delivers a superior line of filtration products for both automotive and heavy-duty applications, including lube, air, fuel, coolant, hydraulic and transmission filters, as well as crankcase breathers valves. With over 4,200 part numbers...Hastings has the coverage you need.

Research

Hastings' personnel is continually researching and updating information to provide wider coverage within the existing filter line and to determine which filters need to be added to ensure complete coverage.

Hastings engineering team uses the latest technology to design filters to perform as needed. Hastings filters are then tested extensively in the lab and in the field.

Quality

Hastings believes in producing quality products. Hastings' manufacturing process is monitored for quality control, resulting in a superior finished product.

Hastings' processes are ISO 9001:2008 quality system certified, assuring that each Hastings filter is manufactured to exacting standards.

Hastings is committed to quality and will accept nothing less.

Commitment

Commitment to coverage and quality means that Hastings filters will perform as expected and provide the protection required. Hastings' commitment does not end after the sale. Providing the best product and service possible is Hastings' goal.

Through the company's website at www.hastingsfilter.com, Hastings provides the information you need 24 hours a day.
